C .Q: for loop to create a group of ranges I have an array that contains various cell ranges (a1, a2, etc.) These cell ranges can contain blank cells (vbs won't work if the target ranges have no information in them). I'm trying to create a function that will check all these cell ranges. If any of the cell ranges contain information, the vbs will run. If all cell ranges contain blank information, the vbs will not run. My problem is that I can't figure out how to create a loop that will check all the ranges, and be able to include each range within an If statement. Here's what I have so far: Sub t() Dim x As Long, m As Range For x = 1 To Len(ActiveSheet.UsedRange.Rows(1).Cells) Set m = ActiveSheet.UsedRange.Cells(x) If Not Len(m.Value) = 0 Then MsgBox "Good to go" 'DO WORK HERE, IF CONDITION IS TRUE Else: MsgBox "Bad to go" Exit Sub End If Next x End Sub f678ea9f9e
